

Client Consent and the PR-VI-SPDATs: What information can I enter into HMIS?

A review of the PR-VI-SPDAT/PR-VI-F-SPDAT and the Client Release of Information

This document can be used to help identify what questions from the PR-VI-SPDAT/PR-VI-F-SPDAT cannot be entered into HMIS if the client does not sign off (initial) on the ROI statement. Current versions of the Client Release of Information, PR-VI-SPDAT, and PR-VI-F-SPDAT documents are located on the SCC HMIS [website: scc.hmis.cc](http://scc.hmis.cc) under the [Forms & Manuals tab](#). Should you need further clarity on a question and how it relates to the ROI statement, please do not hesitate to contact SCC OSH.

Client consent must be documented next to each ROI statement listed below (column 1) to permit the assessment information (columns 2 and 3) to be entered into HMIS. Review the client's signed ROI prior to entering assessment information in HMIS.				
1. Did the client initial next to the ROI statement?	2. PR-VI-SPDAT assessment		3. PR-VI-F-SPDAT assessment	
Identifying information (including: name, birth date, gender, race, ethnicity, social security number, phone number, residence address, or other similar identifying information)	Basic information Section		Basic information Section
